Module Seven Journal Guidelines and Rubric

CS 410 Module Seven Journal Guidelines and Rubric

Overview

In this module, you learned about ethical and legal issues related to software reverse engineering. Specifically, you learned about the Digital Millennium Copyright Act of 1998 (DMCA). This legislation has implications for software reverse engineering and the computer science field. Therefore, in this journal activity, you will reflect on the DMCA and discuss ethical and legal issues related to software reverse engineering.

Prompt

In your journal response, reflect on and address questions about the ethical considerations of the DMCA. You are not required to use sources outside of your course reading material, but you can emphasize and support your thinking. Specifically, you must address the following rubric criteria:

- **Purpose**: What was the purpose and intent of the DMCA?
- **Legality**: What is banned and restricted under the DMCA?
- **Anti–reverse engineering**: Why is the DMCA considered to be an anti–reverse engineering law?
- **Exceptions**: What are exceptions to the DMCA in which reverse engineering is legal and ethical?
- **Impact**: What are your thoughts on the DMCA and its long-term impact on reverse engineering and the computer science field?

What to Submit

Submit your assignment as a 1- to 2-page Word document with double spacing, 12-point Times New Roman font, and one-inch margins. If used, sources should be cited according to APA style.

AI Usage

If you use gen AI tools to support your work on this assignment, be sure to follow these AI usage guidelines. You must acknowledge your use of these tools in your work. Guidelines on how to cite AI tools can be found in this Shapiro Library guide.
